
aiida-tools

Release 0.3.3

Feb 25, 2020

Contents

1	Installation	3
1.1	Reference	3
	Python Module Index	5
	Index	7

This package contains tools that make it easier to create calculations and workflows with AiiDA.

- *Installation*

You can install this tool with with pip:

```
pip install aiida-tools
```

1.1 Reference

This module contains general helper functions to aid in developing AiiDA calculations and workchains.

`aiida_tools.check_workchain_step` (*func*)

Decorator for workchain steps that logs (and re-raises) errors occurring within that step.

`aiida_tools.get_outputs_dict` (*process*)

Helper function to get the RETURN and CREATE outputs of a process as a dict.
