aiida-tools

Release 0.4.1

Jul 07, 2022

Contents

1 Installation **3**
1.1 Reference 3

Python Module Index **5**

Index **7**

This package contains tools that make it easier to create calculations and workflows with AiiDA.

- *Installation*

CHAPTER 1

Installation

You can install this tool with with pip:

```
pip install aiida-tools
```

1.1 Reference

This module contains general helper functions to aid in developing AiiDA calculations and workchains.

aiida_tools.**check_workchain_step**(*func*)
Decorator for workchain steps that logs (and re-raises) errors occuring within that step.

aiida_tools.**get_outputs_dict**(*process*)
Helper function to get the RETURN and CREATE outputs of a process as a dict.
